

## A Fast, Elegant PeopleSoft Experience Inside Your Campus App

*Drive students' success with easy access to registration status, grades, financial transactions and more*

More than 300 institutions use MODO Campus to engage students with a unified, personalized campus app. MODO now offers a turnkey integration that powers a fast, elegant PeopleSoft experience directly within MODO-powered campus apps.

This turnkey integration enables students and faculty to bring information and tasks from **Oracle's PeopleSoft** student management inside the campus mobile app, to register for classes, view schedules, see financial transactions, check grades, and more.

### Set your students up for success with a seamless digital campus experience:

- **Elegant** – Unify the SIS, LMS, communications, and the digital campus to deliver the modern, native mobile experience your students expect
- **Fast** – Gain a 3X performance improvement over other API-based PeopleSoft integrations
- **Pre-built** – Get your campus app up and running and into students' hands quickly and maintain it easily

*“The University of Akron has leveraged the Modo and RojoServe technology partnership to integrate our student class schedules directly with our campus app. Even as students race across campus to get to their next class, the app shows them their schedule, instructor contact information, the class’s location, and even includes GPS-enabled walking directions. The combination of these tools allows students to have the information they need right at their fingertips whenever they need it.”*

— Steve Sedlock, Digital Marketing and Communications Manager, University of Akron

Bringing a fast, elegant PeopleSoft mobile experience into an all-in-one campus app eliminates the need to search and download a separate application or try and access legacy PeopleSoft screens on a smartphone. The integration also leverages Modo Campus’ built-in theming, accessibility, and deep-linking to other app content, ensuring that your PeopleSoft experience is a seamless addition to your holistic campus app.
